SECTION C

INDEX TO VOLUME 19

Subjects

Acenaphthene, Effect of, on development of strawberry fruits, 413.

Agricultural meteorology
Monthly sequence of summer precipitation at Winnipeg, Swift Current, and Edmonton, 85.
Seasonal incidence of rainless and rainy periods at Winnipeg, Swift Current, and Edmonton, 267.
Summer sequence of monthly mean temperature at Winnipeg, Swift Current, and Edmonton, 485.

Alfalfa
Frost resistance and state of protoplasm in, 9.
hybrids, Development of normal ovule in, 421.

Algae, The phytoplankton of southern and central Saskatchewan, 292, 313.

Alternaria in roots of strawberry plants, 189.

Apospory in Poa arctica, 138.

Apple
Analysis of development in fruit of, 371.
Bordeaux spray russeting on, 493.

Ascospores of yeasts, Method for culture of, 254.

Asterocystis in roots of certain cover crop plants grown in strawberry root rot soil, 190.

Bacillarieae, See Algae.

Bacteria
A solution for staining spores and vegetative cells of, 95.
Changes produced in triolein by, 111.
Effect of bacteriophage on streptococii used as starter in cheesemaking, 49.
Numbers of, in strawberry root rot soil under various conditions, 193, 200, 202, 205.
Oxidation and hydrolysis of triolein by, 106.

Bacterial Balance Index
Definition of, 194.
Value of, for various plants, 195, 200, 202, 205.

Bacteriophage in relation to Cheddar cheesemaking, 49.

Barleys and malts, Varietal differences in
XI. Simultaneous relations between malt extract and two or more barley properties, 234.
XII. Summary of correlations between 18 major barley, malt, and malting properties, 278.

Barley properties, See Barleys and malts.

Bordeaux spray, See Russeting.

Bromide, See Ethyl mercuric.

Buds of potato, Abscission of, 146.

Cabbage, Frost resistance and state of protoplasm in, 9.

Cane sugar, Effect of, on vegetative propagation, 99, 257.

Catalpa, Studies on frost resistance and state of protoplasm in, 9.

Cedar, Eastern white, Vegetative propagation of, 257.

Chaetoceros Elmorei in Saskatchewan lakes, 314.

Cheesemaking, Cheddar, Bacteriophage in relation to, 49.

Chlorophyceae, See Algae.

Chromosomes
Behaviour of
in F_1 wheat hybrids, 351.
in potato, 145.
of rye, Effect of cold on, 402.
of Trillium erectum
Coiling of chromonemata in, 383.
Somatic, Differentiation in, 400.
Spiralization cycle in, 323.
of Trillium grandiflorum
Somatic, Differentiation in, 400.
Spiralization cycle in, 323.
of Trillium undulatum, Somatic, Differentiation in, 401.

Chrysanthemum, Rooting of cuttings of, 177.

Chrysophyceae, See Algae.

Cistus
Correlation of characters in C. salviifolius, 27.
Introgression in the section Ladanium, 59.

Clover, Sweet, Sampling methods for seed of, 156.

Colchicine, Effect on development of strawberry fruits, 413.

Coleus Blumei, Rooting of cuttings of, 177.

Conifers
Frost resistance and state of protoplasm in Picea, 9.
Vegetative propagation of
IX. Effects of chemical treatments and a wax spray on the outdoor propagation of spruce cuttings, 257.
X. Effects of season of collection and propagation media on the rooting of Norway spruce cuttings, 391.
Effects of talc dusts containing phytohormone, nutrient salts and an organic mercurial disinfectant on the rooting of dormant Taxus cuttings, 21.

Cornus, Studies on frost resistance and state of protoplasm in, 9.

Cover crops
Changes induced in strawberry root rot soil by incorporation of, 183.
Rhizophere and decomposition effects of, in relation to the microbiological balance of strawberry root rot soil, 199.

Ctenocladus, Possible occurrence in Saskatchewan, 293.

Culture media for isolation and growth of yeasts, 251.

Cuttings, Rooting of
of conifers, See Conifers.
of herbaceous plants, 40, 177.
of shrubs, 99.

Cyanophyceae, See Algae.

Dahlia, See Cuttings.

Debaryomyces, Isolation and culture of, 252.

Deutzia Lemoinei, Rooting of cuttings of, 102.

Differential reactivity, Studies in, I. The rate and degree of differentiation in the somatic chromosomes of Trillium erectum L., 400.

Dinophyceae, See Algae.

Embryo development of Poa arctica, 138.

Embryo sac development in Poa arctica, 136.

Endosperm development in Poa arctica, 138.

Equisetum, The "leaf gap" in seven species of, 80.

Ethyl mercuric bromide, Effect of
on germination and growth of wheat, 211.
on rooting of cuttings, 21, 99, 177.

Ethyl mercuric phosphate, Effect of, on vegetative propagation of conifers, 257.

Fat, Action of micro-organisms on, 106, 111.

Flour, Changes in properties of gluten with aging of, 163.

Flowers of potato, Abscission of, 146.

Fragaria
chiloensis, used in study of reaction of F. virginiana to yellow-edge, 225.
vesca, used in study of reaction of F. virginiana to yellow-edge, 225.
virginiana, Reaction of, to yellow-edge, 225.
See Strawberry root rot.

Frost resistance and the physical state of protoplasm, The relation between. II. The protoplasmic surface, 9.

Fruit
Apple
An analysis of development in, 371.
Bordeaux spray russeting on, 493.
Potato, Abscission of, 146.
Strawberry, Induction of parthenocarpic, 413.
Tomato
Effect of waxing on, in storage, 500.
Inheritance of size in, 216.

Fungi
Action of micro-organisms on fat, 106, 111.
Effect of
bacteriophage on organisms used in cheesemaking, 49.
temperature on stem rust resistance of wheat, 438.
Factors influencing the virulence of Helminthosporium sativum and Fusarium culmorum, 42.
Isolation and culture of film-forming yeasts, 251.
on and in roots of strawberry and certain cover crop plants, 190, 191, 206.
Phytophthora tomato disease new to Ontario, 446.
Purple dwarf of potato, 68.
Reaction and distribution of physiologic races of Puccinia triticina in Canada, 121.
Solution for staining spores and vegetative cells of some, 95.
Studies on Puccinia minussensis, 75.
Studies on Rhizoctonia Solani, 1.
Studies on yeasts, 251.

Fusarium culmorum, Factors influencing virulence of, 42.

Gluten, See Flour.

Helminthosporium
in roots of certain cover crop plants grown in strawberry root rot soil, 190.
Helminthosporium sativum, Factors influencing virulence of, 42.

Heterokontae, See Algae.

Hormones, Plant, See Phytohormones.

Hybrids
Alfalfa, Development of normal ovule in, 421.
Cistus, See Cistus.
Wheat, Chromosome behaviour in, 351.

Hydrangea, Frost resistance and state of protoplasm in, 9.

Hydrolysis of triolein by bacteria, 106.

Indolylacetic acid, Effect of
on germination and growth of wheat, 211.
on propagation of spruce cuttings, 257.
on rooting of stem cuttings, 99.

Indolylbutyric acid, Effect on development of strawberry fruits, 413.

Iresine, Rooting of cuttings of, 177.

Lactuca pulchella, Puccinia minussensis on, 75.

"Leaf gap" in Equisetum, 80.

Light, Effect on reaction of physiologic races of Puccinia triticina, 121.

Lonicera tatarica, Rooting of cuttings of, 104.

Lycopersicon esculentum, See Tomato.

Lyngbya Birgei, New variety of, 292, 303.

Malt, See Barleys and Malts.

Malting properties, See Barleys and Malts.

McIntosh red apples
Analysis of development in, 371.
Bordeaux spray russeting on, 493.

Medicago hybrids, Development of the normal ovule in, 421.

Meiosis, See Chromosomes.

Mercury, Organic, See Ethyl mercuric bromide and Ethyl mercuric phosphate.

Meteorology, See Agricultural.

Microbiology
Microbiological balance of strawberry root rot soil as related to the rhizosphere and decomposition effects of certain cover crops, 199.
Strawberry root rot in relation to changes induced in root rot soil by the incorporation of cover certain crops, 183.

Micronuclei in pentaploid wheat hybrids, 361.

Micro-organisms
Effect of bacteriophage on streptococci used in cheesemaking, 49.
in roots of certain cover crop plants grown in strawberry root rot soil, 190.
in root rot soil in relation to rhizosphere and decomposition, 203.
in relation to rhizosphere and decomposition effects of certain cover crops, 200, 201, 202, 203, 205, 206, 207.
Solution for staining spores and vegetative cells of, 95.
The action of, on fat
III. Oxidation and hydrolysis of triolein by pure culture of bacteria, 106.
IV. Observations on the changes produced in globules of triolein by pure cultures of bacteria, 111.

Microspores
of Trillium, Chromosome spiralization in, 323.
in potatoes, 152.

Mycorrhiza
in roots of certain cover crop plants grown in strawberry root rot soil, 189, 190.
in roots of strawberry plants grown in treated and untreated root rot soil, 189, 191.

Naphthylacetic acid, Effect on development of strawberry fruits, 413.

Naphthylbutyric acid used as phytohormone, 21, 40, 177.

Nematodes, in roots of strawberry and certain cover crop plants, 190, 191.

Nodularia spumigena, in saline lakes of Saskatchewan, 304.

Nutrient salts, Effect of, on rooting, 21, 99, 177.

Oats, Sampling methods for seed of, 156.

Organic mercury, See Ethyl mercuric bromide and ethyl mercuric phosphate.

Ovary, See Fruit.

Ovule, Development of, in alfalfa, 421.

Oxidation of triolein by bacteria, 106.

Parthenocarpy, Induction of, in strawberries, 413.

Parthenogenesis in Poa arctica, 138.

Peat, Used in propagation of cuttings, 21, 391.

Picea
abies, Vegetative propagation of, 257.
Frost resistance and state of protoplasm in, 9.
glauca, Vegetative propagation of, 257.

Phosphate, See Ethyl mercuric.

Phythium in roots of strawberry and certain cover crop plants, 189, 190.

Phytohormones, Effect of
on development of strawberry fruits, 413.
on germination and early growth of wheat, 211.
on rooting
of herbaceous cuttings, 40, 177.
of shrubs, 99.
of Taxus, 21.

Phytophthora parasitica
Control of, on tomato, 477.
Cultural studies on, 451.
Description of, 448.
Epidemiology of, 456.
Tomato disease caused by, 447.

Phytoplankton, See Algae.

Plankton, See Algae.

Plant hormones, See Phytohormones.

Pleurocladia lacustris, Possible occurrence in Saskatchewan, 293.

Poa arctica, Development of twin embryo sacs, embryos, and endosperm in, 135.

Pollen formation in potatoes, 148.

Polyploidy, Chromosome behaviour in pentaploid wheat hybrids, 351.

Potassium
acid phosphate, Effect on vegetative propagation, 99, 257.
naphthylacetate, Effect on germination and growth of wheat, 211.
nitrate, Effect on germination and growth of wheat, 211.

Potato
Purple dwarf of, 68.
Sterility in, 145.
Virulence of Rhizoctonia Solani on, 1.

Pratylenchus pratensis, See Nematodes.

Precipitation, See Rainfall.

Premature softening of tomato fruits in storage, 514.

Propagation of cuttings, See Cuttings.

Protoplasm, Relation between frost resistance and physical state of, 9.

Pseudomycelium in yeasts, Method for observation of structure of, 254.

Puccinia
graminis Tritici, Effect of temperature on resistance of wheat varieties to, 438.
minussensis, Studies on, 75.
triticinia, Environmental reaction of physiologic races of, and their distribution in Canada, 121.

Purple dwarf of potato in Alberta, 68.

Rainfall
Correlation with fluctuations in temperature, 485.
Monthly sequence of summer precipitation at Winnipeg, Swift Current, and Edmonton, 85.
Seasonal incidence of rainless and rainy periods at Winnipeg, Swift Current, and Edmonton, 267.

Rhizoctonia
in roots of strawberry and certain cover crop plants, 189, 190.
Solani, Virulence of, in steam sterilized and natural soil, 1.

Rhizophagus sp? in roots of strawberry plants grown in treated and untreated root rot soil, 183.

Rhizosphere, See Bacteria.

Root rot, See Strawberry.

Root rot soil, See Strawberry.

Roots of strawberry and certain cover crop plants as grown in strawberry root rot soil, 183, 199.

Russeting, Bordeaux spray, Origin and development of, on apple, 493.

Rusts, See Fungi.

Rye, See Secale.

Scar tissue caused by Bordeaux spray on apple, 493.

Secale cereale, Effect of cold on somatic chromosomes of, 402.

Sedge peat in propagation media for conifers, 391.

Seed(s)
Development of the normal ovule in alfalfa, 421.
production and seedlings of potato, 153.
Relative efficiency of sampling methods for, 156.

Seedlings, Twin, Development of, in Poa arctica, 140.

Soil
Natural and steam sterilized, Virulence of Rhizoctonia Solani in, 1.
Strawberry root rot
Changes induced in, by incorporation of cover crops, 183.
The microbiological balance of, as related to the rhizosphere and decomposition effects of certain cover crops, 199.

Sphagnum peat in propagation media for conifers, 391.

Spiralization, See Chromosomes.

Spore(s)
Formation of, in yeasts, Culture method for, 254.
of micro-organisms, A solution for staining, 95.

Spray, See Russeting.

Spruce cuttings, See Cuttings.

Stains, A solution for staining differentially the spores and vegetative cells of micro-organisms, 95.

Stem cuttings, See Cuttings.

Strawberry
fruits, Induction of parthenocarpic, 413.
Reaction of F. virginiana to yellow-edge, 225.
root rot in relation to induced microbiological changes in root rot soil by the incorporation of certain cover crops, 183.
root rot soil, Microbiological balance of, as related to rhizosphere and decomposition effects of certain cover crops, 199.
varieties used in study of reaction of Fragaria virginiana to yellow-edge, 225.

Streptococcus cremoris and S. lactis, Effect of bacteriophage on, 49.

Sugar, Cane, See Cane sugar.

Surface browning of tomato fruits in storage, 516.

Surface pitting of tomato fruits in storage, 516.

Surface pocketing of tomato fruits in storage, 516.

Sweet clover, See Clover.

Symphoricarpus albus, Rooting of cuttings of, 103.

Talc, Effect of, on vegetative propagation, 21, 40, 99, 177, 257.

Taxus cuspidata, Rooting of, 21.

Taxus cuttings, See Cuttings.

Temperature
Effect of
on reaction of physiologic races of Puccinia triticina, 121.

Temperature—*continued.*
Effect of
on stem rust resistance of wheat varieties, 438.
Summer sequence of monthly, at Winnipeg, Swift Current, and Edmonton, 485.

Thielaviopsis basicola in roots of strawberry and certain cover crop plants, 188, 190, 191.

Thuja occidentalis, Vegetative propagation of, 257.

Tomato
Disease of, caused by Phytophthora parasitica, 446.
Effect of purple dwarf on, 72.
fruits in storage, Effect of waxing on, 500.
Inheritance of fruit size in, 216.

Trillium, See Chromosomes.

Triolein
Changes produced in, by bacteria, 111.
Oxidation and hydrolysis of, by bacteria, 106.

Triticum, See Wheat.

Vegetative cells, of micro-organisms, A solution for staining, 95.

Vegetative propagation, See Cuttings.

Virus
of yellow-edge, Reaction of Fragaria virginiana to, 225.
Purple dwarf of potato, a possible, 68.

Wagener apples, An analysis of development in, 371.

Wax
Effect of application of, to tomato fruits in storage, 500.
spray, Effect on propagation of spruce cuttings, 257.

Weigela rosea, Rooting of cuttings of, 101.

Wheat
Changes in gluten with aging of flour, 163.
Effect of
phytohormone, potassium nitrate, and ethyl mercuric bromide on germination and growth of, 211.
temperature and light on reaction of varieties of, to leaf rust, 121.
temperature on stem rust resistance of varieties of, 438.
hybrids, Chromosome behaviour in, 351.
Sampling methods for seed of, 156.

Yeasts
A solution for staining spores and vegetative cells of, 95.
Studies on film-forming. I. Media and methods, 251.

Yellow-edge, Reaction of Fragaria virginiana to, 225.

INDEX TO VOLUME 19

Subjects

Autosomes, Interaction between, in Drosophila, 75.

Azygia, Reidentification of species of, 46.

Bacon
Canadian Wiltshire
XIV. Seasonal variations in colour and colour stability, 22.
XV. Quantitative bacteriological and chemical changes in tank pickle and on bacon during cure and maturation, 61.
XVI. Colour and colour stability of pork after frozen storage and conversion to bacon, 85.
XVII. Rancidity in pork fat after frozen storage and conversion to bacon, 96.
XVIII. Effect of temperature and bacterial growth on nitrite content, 104.
XIX. Comparative flavour tests on Canadian and Danish bacons, 157.
XX. A comparison of certain chemical and physical properties of Canadian and Danish bacons and their relation to flavour quality, 213.
XXI. Objective colour comparisons of Canadian and Danish bacons and their relation to subjective observations of colour quality, 225.
XXII. Comparative carcass quality of Canadian and Danish bacons, 233.
Effect of temperature and humidity on colour of lean, and development of rancidity in the fat, of pork during frozen storage, 53.
Methods for investigation of rancidity, their interrelation, and application to bacon fat, 278.

Bacteria
Effect of growth of, on nitrite content of bacon, 104.
in curing pickle for bacon, Changes in numbers of, 64.
New method for freeing paramecia of, 144.
on bacon
Changes in numbers of, during cure, 68.
Effect of curing practices on numbers of, 70.
Proteus hydrophilus as cause of "red sore" in pike, 139.

Beetles, Potato, See Insects.

Birds, See Duck.

Blood
Human, Storage studies on, 185.
Sheep's, Ability of erythrocytes of, to survive freezing, 206.

Brachyphallus crenatus Rudolphi, Synonymy of, with Hemiurus appendiculatus in part, of Stafford, 41.

Chromosomes, Interaction between autosomes of Drosophila, 75.

Colour and colour stability
Comparison of, in Canadian and Danish bacons, 226, 228.
Comparison of subjective and objective observations as means of testing, in bacon, 229.
of lean of pork, Effect of temperature and humidity on, 55, 57.
of pork after storage and conversion to bacon, 85.
Seasonal variations in, 22.

Coramine, Detection of, in horse saliva, 347.

Crepidostomum
C. cooperi Hopkins, Synonymy of, with C. laureatum of Stafford, 31.
C. laureatum, See C. cooperi.

Cryptogonimus diaphanus Stafford, Redescription of Protenteron diaphanum, 48.

Curing pickle for bacon, Bacteriological and chemical changes in, 64.

Diapause
in Diprion polytomum, 363, 383.
in Gilpinia polytoma
Bioclimatic relations and, 350.
Factors influencing breaking of, 323.
Factors influencing inception of, 295.
Influence of food and, on reproductive capacity, 417.
in relation to epidemiology, 437.
in Hylotoma pectoralis, 363, 383.
in Pristiphora erichsoni, 363, 383.
in species of Neodiprion and Pikonema, 363, 383.

Diphyllobothrium latum
Cultivation of, 240.
Rate of growth of, 245.

Diprion polytomum, Diapause in, 363, 383.

Diptera
Autosomes of Drosophila, 75.
Male genitalia in Gonia, member of calyptrate, 1.

Drosophila melanogaster, Interaction between autosomes of, 75.

Duck, Greater and Lesser Scaup Duck in British Columbia, 114, 123.

Erignathus barbatus barbatus, Food of, 150.

Erythrocytes, See Blood, Sheep's.

Esox lucius, "Red sore" disease of, 139.

Fat
of bacon
Comparison of, in Canadian and Danish bacons, 237.
Quality of, in Canadian and Danish bacons, 157.
of pork, See Pork.

Fellodistomum
F. agnotum Nicoll, Possible synonymy of, with F. incisum of Stafford, 43.
F. fellis Olsson, Synonymy of, with Fellodistomum incisum of Stafford, 43.

F. incisum, See F. fellis.

Fish, See Pike and Trematodes.

Flavour
of bacon, Relation of certain chemical and physical properties to, 213.
tests on Canadian and Danish bacons, 157.

Fluorimeter, A photoelectric, 253.

Frogs
Effect of Proteus hydrophilus on, 141.
used in test for coramine, 348.

Gasterostomum armatum, See Prosorhynchus squamatus.

Genitalia, Male, Study of, in Diptera, 1.

Gilpinia polytoma, Diapause and related phenomena in, 295, 323, 350, 417, 437.

Gold fish, Effect of Proteus hydrophilus on, 140.

Gonia, Male genitalia in, 1.

Haemoglobin, See Blood, Human.

Haemolysis in stored blood, 185, 206.

Hemiurus levinseni Ohdner, Synonymy of, with Hemiurus appendiculatus in part, of Stafford, 41.

Homalometron pallidum Stafford, Redescription of, 31.

Horse saliva, See Coramine.

Hylotoma pectoralis, Diapause studied in, 370.

Hymenolepis fraterna, Cultivation of, 240.

Hymenoptera, Diapause in species of Tenthredinidae, 295, 323, 350, 363, 383, 417, 437.

Insects
Diapause and related phenomena
in Diprion, Pristiphora, and other genera, 363, 383.
in Gilpinia, 295, 323, 350, 417, 437.
Estimation of populations of potato beetles, 267.
Interaction between autosomes of Drosophila, 75.
Male genitalia in Gonia, 1.
Statistical study of effect of temperature on pupation of, 177.

Lean
of bacon
Comparison of, in Canadian and Danish bacons, 235.
Quality of, in Canadian and Danish bacons, 157.
of pork, See Pork.

Lepidapedon rachion (Cobbold), Description of, 31.

Leptinotarsa decemlineata, Estimation of populations of, 267.

Mice, Effect of Proteus hydrophilus on, 141.

Moniezia expansa, Cultivation of, 240.

Neodiprion, Species studied for diapause, 370.

Neophasis pusilla, Redescription of, 33.

Nitrite content of bacon, Effect of temperature and bacterial growth on, 104.

Nyroca in British Columbia
N. affinis, 123.
N. marila, 114.

Otodistomum, Reidentification of species of, 47.

Oxyhaemoglobin, See Blood, Human.

Paramecia
New method for washing, 144.
Some growth experiments on, 148.

Parasites, See Tapeworms and Trematodes.

Pest, An agricultural, Method of estimating the population of, over areas of many square miles, 267.

Phoca, Food of P. groenlandica and P. hispida, 150.

Pickle for curing bacon, See Curing pickle.

Pike, "Red sore" disease of, 139.

Pikonema, Species studied for diapause, 370.

Plankton, See Zooplankton.

Podocotyle
P. atoman Rudolphi, Synonymy of, with Sinistroporus simplex in part, of Stafford, 35.
P. reflexa Creplin, Synonymy of, with Sinistroporus productus and S. simplex in part, of Stafford, 35.
P. staffordi, New trematode species, 37.

Pork
Colour and colour stability of, after frozen storage and conversion to bacon, 85.
Effect of temperature and humidity on colour of lean, and development of rancidity in the fat, of pork during frozen storage, 53.
Rancidity in fat of, after frozen storage and conversion to bacon, 96.

Potato beetles, See Insects.

Pristiphora erichsoni, Diapause in, 363, 383.

Prosorhynchus squamatus Ohdner, Synonymy of, with Gasterostomum armatum of Stafford, 29.

Protenteron diaphanum Stafford, Redescription of, 48.

Proteus hydrophilus
Antigenic structure of, 141.
Cause of "red sore" in pike, 139.
Morphology of, 142.
Pathogenicity of, 140.

Pupation, Effect of temperature on, 177.

Rancidity, See Bacon and Pork.

"Red sore" of pike, 139.

Riboflavin, Fluorimeter for determination of, 253.

Sagitta elegans arctica, Breeding cycle in, 258.

Saliva, See Coramine.

Sawfly
European spruce, Diapause in, 295, 323, 350, 363, 383, 417, 437.
Larch, Diapause in, 363, 383.

Scaup Duck, See Duck.

Seals, Arctic, Food of, 150.

Snake, Effect of Proteus hydrophilus on, 141.

Stenakron vestutum Stafford, Redescription of, 38.

Steringophora furciger Olsson, Synonymy of, with Leioderma furcigerum of Stafford, 44.

Tapeworms
Cultivation of, in artificial media, 240.
Rate of growth of Diphyllobothrium latum, 245.

Temperature, Effect of
on nitrite content of bacon, 104.
on pork during storage, 53.
on pupation, Statistical study of, 177.

Thiochrome, Fluorimeter for determination of, 253.

Thomnophis sirtalis, See Snake.

Trematodes of Canadian fishes, Study of Stafford's report on, and descriptions of, 28.

Vitamin B_1, Fluorimeter for determination of, 253.

Waterfowl, See Birds.

Wiltshire bacon, See Canadian Wiltshire.

Zooplankton, Breeding cycle in Sagitta, member of Arctica, 258.
